

TO H. R. Duhon DATE July 21, 1989
FROM C. H. Dennis (CHD) SUBJECT Vinyl Training

Howard:

Per your request, this is the lesson plan I use to conduct annual vinyl chloride training:

- Substance Identification
- Physical Properties
- Exposure Limits
- Nature of The Hazard (fire hazard, carcinogenic, etc.)
- Medical Surveillance
- Monitoring Program - Area & Employee
- Respiratory Protection
- Potential For Exposure
- Protective Steps
- Emergency Procedures

I used this same outline for 1988 with the addition of a short talk by Clark Graybill, an experienced vinyl operations supervisor.
