INTEROFFICE / LAKE CHARLES

TO Mr. I. C. Klimas

DATE June 3, 1977

REC'D JUN 3 1977

FROM J. R. Farst

SUBJECT VDCM Containment

Ref: VDCM Task Force Memo
Dated 5/31/77

As stated in the reference memo, the initial phase of the VDCM study has been accomplished which should let Ben Evans get started on his phase of this project. I understand Ben plans to hold a meeting in Lake Charles next week in this regard.

Bob Lynch will continue to be Lake Charles' contact on this effort and will call on other members of the plant VDCM task force as needed as work progresses. Don Savoy is working closely with Ben Evans and Tommy Miller is following up with Technical personnel to devise some satisfactory destruction technique for VDC.

All concerned should feel free to communicate directly with Bob Lynch on any matters concerning this project.
