H. M. Jackson, Manager
Industrial Health Program
Johns-Manville Corporation
Twenty-Two East Fortieth Street
New York, 16, New York

Dear Mr. Jackson:

Please accept our thanks for your letter of May 21st and the enclosed copy of Standard Practices for Air Hygiene Survey Sampling and Laboratory procedures. I am sure that this will be helpful in the program that we have under way here.

Could you give me the name of some outside engineering company that is capable of analyzing various conditions in the Textile Production Departments and make recommendations for equipment that would improve the Air Hygiene? During the period since we installed the dust control and removal system in the various departments there must have been considerable advancement in this branch of engineering.

It would be very much appreciated, if you know of one or two engineering concerns who are specializing in this field, if you would kindly send us their names.

Again many thanks for your help.

Very truly yours,

hrs

O. H. Cilley
