FROM Richard T. Green, M. D. ADDRESS New Orleans
SUBJECT Asbestosis Control DATE August 7, 1969

PLAINTIFF'S EXHIBIT

ETCO-616

A meeting in New Orleans on July 31, 1969 was held for the purpose of discussing the necessity for and the method of approach to an asbestosis prevention program on the Baton Rouge Plant. Drs. Roush, Bock, Rinehart and Green were present.

It was agreed that the first step would be an environmental survey of asbestos handling including dust counts. Dr. Rinehart will arrange for the hygiene survey in the near future.

Since other aspects of asbestosis control depend upon the results of the hygiene survey, other control measures need not be implemented until the hygiene survey is completed.
