Northbrook, Illinois 60062

Dear Ms. Bonahoom:

In 1971, a study was conducted under number IBT B7298 which was a two-year chronic oral toxicity in rats with AROCLOR 1242, 1254 and 1260. Subsequently, slides were made of all livers and one report number IBT 641-06672, entitled Histopathological Evaluation of Liver Sections was issued.

We would appreciate any information regarding the status and availability of these rat liver slides.

Very truly yours,

Arthur F. Uelner
