MEMORANDUM

December 8, 1972

To: C. E. Thurston, Jr.

Re: Asbestos Insulation Products - Meeting, December 8, 1972

At the subject meeting attended by E. E. Owens, J. W. Hoffmann, C. H. Armstrong, and myself, in your office, the following decisions were made:

1. J. W. Hoffmann will coordinate with C. H. Armstrong the procurement of several samples of asbestos-free cements for testing by his craftsmen under controlled conditions in the warehouse.
2. 7-M asbestos cement will not be replaced as it is depleted from current stock.
3. Asbestos cloth will be continued in stock for sales reasons, but a substitute in the form of "Clean-Guard" from H. K. Porter is to be investigated. Alex Smith, Vice President - Sales with H. K. Porter, is to come and give a presentation on the product within two weeks.
4. Unibestos stocks are to be depleted. Roanoke stock is to be investigated, possibly moved to Norfolk for sale.
5. J. W. Hoffmann stated that in the interim the Contract Department would use asbestos cloth only on jobs requiring small amounts of cloth and that on jobs requiring larger amounts, glass or treated cloth would be substituted.

The meeting adjourned approximately 10:30 a.m.
