T-1991 IN MAINTENANCE FINISHES

From a toxicological standpoint, a replacement of salicylanilide with 0.1% T-1991, benomyl, in 112-941, 81-5203, and 689-707 maintenance finishes presents no significant toxicological hazard.

WILLIAM W. MILLER
TOXICITY COORDINATOR

P.S. Per your request, I am returning computer print-out sheets.
