From LEE T. FREELAND Location Bldg 3 Phone No. 461

Subject ASBESTOS MONITORING. Date 3-30-78

C.E. Bunn mentioned that Firestone (Orange) had been cited by OSHA for not having monitored for asbestos exposure during "GARLOK" gasket cutting. Since we will monitoring Shops for Asbestos again I recommend you determine if the "GARLOK" used on the plant contains any asbestos. Some additional measurements may be warranted. If you have any questions please call me.

Thanks
