my contacts with a man who we called Colonel Bartley who was an attorney in St. Louis.

He was the attorney for asbestos -- or Local One of the Asbestos Worker Union which is headquartered in St. Louis, and it has to do with what eventually became a proposal approved by Mr. Bartley that an in-depth study be made of the possibility of hazards resulting from exposure to the dust of fiberglass wool products.

And I don't know if it is in here or not, but eventually it turned out that with Mr. Bartley's full cooperation, contacts were made with Dr. Walter J. Siebert to undertake this study which is fully documented in the materials that you have.

BY MR. SMITH:

Q Mr. Ames, I am going to show you an exhibit marked Lake Exhibit 6 for identification. Will you identify that for us.

A This is a memorandum addressed to Harold Boeschenstein dated January 7th, 1942. That is a
