**Subject:** The Narragansett Bay Estuary Program

Mr. Pruitt,

Please don't silence scientists. My tax dollars pay for the research these intelligent people have completed and taxpayers deserve to hear what their research has uncovered about the condition of the bay. The scientists who wrote the report should be free to speak on their findings and their methodology.

Do we need to fear scientific reports and knowledge? No. What we need to fear is suppression of them and those who do the suppressing.

Sincerely,

(b) (6)
