

NEW FILTER MASK FROM 3M

*Gives excellent filtration against pollens
and non-toxic dusts, powders and spray particles!*

eliminates irritating dust and pollen while you plow, plant.

Dust and pollen are nothing to be sneezed at—especially when you spend long workdays outdoors plowing and planting.

3M Filter Masks are now available to help you clear the air of this stifling problem.

They protect health and comfort by blocking foreign particles from your respiratory passages. They're lightweight for all-day comfort.

Easy to breathe and talk through. Won't interfere with glasses.

Effective? They were modeled after famous 3M surgical masks, used extensively in hospital operating rooms!

3M Filter Masks are durable enough for re-use—or low-cost enough to discard after a single wearing, if you wish. One size fits all faces.

Look for this handy 3-pack of disposable masks at your favorite store!

FARMERS: Stop inhaling irritating *dust* and *pollen*!

3M[®] Filter Mask protects against pollens and 52597

3M BRAND Filter Mask protects against pollen and non-toxic dusts, powders and spray particles!

Wear it for . . . Plowing and Planting—Cultivating—Harvesting—Grain Storing—Spray Painting—Protecting Baby from Colds

ating airborne particles are nothing to sneeze at. They congest lungs and nasal passages, cause discomfort, colds and hay fever.

But now 3M Brand Filter Masks are available in a convenient 3-pack to help you clear the air of this annoying problem.

Why are they made-to-order for farmers? Many reasons. They protect health and comfort by blocking pollens and non-toxic dusts, powders and spray particles from respiratory passages. These masks are lightweight, comfortable enough

for all-day jobs. Only edges contact your face, so they're

easy to breathe and talk through. And they won't interfere with glasses.

Best of all, they're effective, (they were modeled after famous 3M surgical masks, used extensively in hospital operating rooms.) These sanitary dust masks have actually been proved 90.6% efficient (by weight) in atmospheres with 96% of particles smaller than 5 microns.

3M Filter Masks are durable enough for re-use, yet inexpensive enough for disposal after a single wearing if conditions require it. One size fits all faces.
