

INSULATION (CAL SILITE)

(1970)

DECEMBER

D. Thermal Insulation

Laboratory work continues in an effort to develop data to support the patentability of the asbestos free Calsilite formulation. Dow Chemical has issued a new purchase specification for high temperature insulation that permits no asbestos content.

Evaluation of DuPont's sodium silicate - perlite, insulation led to the conclusion that their development product was of good quality and worthy of further investigation. This requires signing a secrecy agreement which is now being negotiated.
