Dear Mr. Ross:

I am writing to you today as a fellow procurer of environmental services. Westinghouse Environmental Affairs has the responsibility to ensure corporation compliance with environmental and occupational health regulations. This is often done through contracted services.

I understand that you are presently considering HAZTECH and Amaral & Neumeyer for environmental remediation and asbestos abatement, respectively, at your facility in Moundsville, West Virginia. Westinghouse has a comprehensive Corporate Environmental Affairs program and has successfully used both of these firms on various projects.

Corporate Industrial Hygiene is directly responsible for asbestos assessment within Westinghouse and for reviewing the qualifications of abatement contractors. We have used Amaral & Neumeyer in eight major asbestos abatement projects in three different states over the last three to four years. Each project was successfully completed on time and within budget. They have also participated as trainers in (W) asbestos workshops for maintenance and safety personnel.

Amaral & Neumeyer is an approved license asbestos abatement contractor in Ohio, New Jersey, Maryland, New York, Kentucky, and Allegheny County, Pennsylvania. Currently West Virginia does not have similar contractor licensing requirements.

If you have any questions about Amaral & Neumeyer as a qualified subcontractor to the HAZTECH team, please call me (412)-256-1362.

Sincerely,

C.W. Bickerstaff
