

December 26, 1973

TO: ASBESTOS STUDY COMMITTEE

SUBJECT: ACTIVITY CONCERNING ASBESTOS

Mr. I. H. Weaver, Chairman of the Committee has kept me abreast on various activities in government, industry and in the press concerning asbestos. Because of the considerable amount of literature I am only forwarding articles that your Chairman specifically suggested I send to the Committee Members. These articles are:

1. "Type of Asbestos and Respiratory Cancer in the Asbestos Industry" (Types of asbestos and their carcinogenic potentials).
2. "Asbestos Health Question Perplexes Experts" (A summary of the Durham, N.C. meeting on the biological effects of ingested asbestos).

In addition, I have listed all the articles received from Mr. Weaver which are related to the asbestos problem. Should you wish a copy of any of these articles, please let me know. One item is a 16 page booklet entitled "CAUTION: ASBESTOS DUST.... I do not have extra copies of this booklet but they are available at a price from Channing L. Bete Co., Inc., 45 Federal Street, Greenfield, Mass. (or directly from NIOSH). See attached price list for this booklet.

The foregoing is to keep the Committee posted concerning literature on asbestos.
