it's beautiful and keeps your kitchen buttercup bright

Stanthony VENTILATING HOODS

Every bit of your kitchen will stay as bright as a buttercup when you have a Stanthony Ventilating Hood over the range. Cooking odors and greasy vapors are trapped at their source. A Stanthony Ventilating Hood whisks them out quickly, quietly, and efficiently before they can spread to other rooms in your home. The cause of ugly stains on walls, ceilings, curtains and furnishings is eliminated completely.

EASIER TO CLEAN. Twin grease filters of aluminum foil, prevent grease accumulations in blower and housing. They are easily washed in hot water and any household detergent.

SAFEST TO USE. An automatic switch shuts off all power when housing is unlatched. To remove filters, unlatch housing and simply slide them out.

PROVINCIAL

Scalloped design in copper-lined enamel for French Style or Early American Kitchen.

ARISTOCRAT

In white, copper, or Duxbury colors in beautiful baked enamel for homes in Modern Decor.

Stanthony VENTILATING HOODS

the best way to ventilate a kitchen

Joseph B. Haverstick, NAHB president, sent a letter to builders-members last week advising them to cut back on production rather than risk financial losses. Government officials are watching to see if August housing starts dropped below the annual rate of one million for the first time since December, 1951. The report is due in a week to 10 days.

Four-fifths of the decline in home construction, which has been under way a full year now, is in FHA and VA programs.

FHA applications were off 25 per cent in the first seven months of this year and GI applications were down 20 per cent. Conventional financing, with unrestricted interest rates, showed little change.

LAST FIFTEEN

Sites Filled At Foothill Subdivision

Construction has started on the last 16 houses in Foothill Estates, a country-type subdivision of 11 homes north of El Cajon.

Glenn Napier-Skie, of the H and N Construction Co., said 15 of the new homes have been completed and families are beginning to move in this week. All the other houses are in various stages of construction. Napier-Skie said sales response had been good among families seeking homes with a country atmosphere. Each of the sites is a third of an acre. The subdivision is on the slope of foothills, overlooking the nearby Flying Hills golf course.

All homes have been "roughed in" for air conditioning equipment and Napier-Skie said about 10 per cent of the buyers are ordering the complete installation at the time of purchase. Others said they plan to install air conditioning later, possibly next summer.

No house in the entire subdivision is the duplicate of another, due to differences in exterior materials and trim. There are four different floor plans. The homes vary from 1,300 to 1,460 square feet and all have either three or four bedrooms, with two bathrooms.
