19th December, 60.

Dr. J. McNulty,
Chest Physician,
Kalgoorlie District Hospital,
KALGOORLIE.

Dear Dr. McNulty,

Further to my letter of the 21st ultimo I would advise that the State Mining Engineer, Mr. Brisbane, and the Senior Inspector, Mr. Boyland, have since discussed with Mr. Thomas of Australian Blue Asbestos the various aspects of your report and our own recent ventilation report.

Mr. Thomas advised that a number of staff changes are pending and explained what these were and our officers hope that these will have a beneficial effect. They are also confident that the Government will receive every support from the mine management in the proposals put forward to improve conditions underground.

The Company has a firm of dust control consultants, Messrs. Hart & Company, at present at work on the mill conditions.

Early in the year, when I receive further information, I will again write to you in order that you may be kept aware also of progress.

With kind regards and best wishes for Christmas,

Yours sincerely,

P.30-1-61.
16-3-61.
