Attached is a memo from David Bayliss, Assistant Chief - Biometric Branch of NIOSH requesting some information as a result of the visit we had with David Bayliss and Ed Baker at the Krummrich Plant.

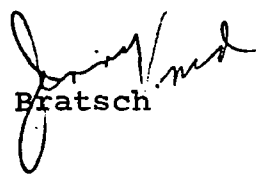

Bob, please send me several copies of an official document that we have released on Item #1, a publication showing plants and the products they make. Also, could I have the data that Paul Heisler has under Item #2, we did from PCB air sampling.

Bill, Item #3, we have answered their questions several times, listing our customers and buyers of PCB's from Monsanto. Could you please give me "official" wording that we have used with the government many times regarding customer lists?

While this memo was addressed to Dr. Roush, George and I have agreed that I will maintain responsibility for contact and communications with David Bayliss, so please route all of this information through me.

Could I have this information by May 12?

G. L. Bratsch
