IN REPLYING

ADDRESS THE SURGEON GENERAL

U. S. PUBLIC HEALTH SERVICE

Industrial Hygiene Division

September 24, 1946

Dr. Robert A. Kehoe
Kettering Laboratory of Applied Physiology
University of Cincinnati
Cincinnati 19, Ohio

Dear Dr. Kehoe:

Thank you very much for your thoughtful letter and comments regarding the paper I sent you.

I would not wish to convey the impression of fault finding and certainly of any particular group. My reference to blood lead has, as its aim, the too readily accepted values of many routine analysts.

Your discussion of the several points mentioned will, of course, be very welcome, and I trust that the Conference as a whole will, if nothing else, impress upon the members the importance of care in the diagnosis of lead poisoning.

With best regards, I am

Sincerely yours,

L. T. Fairhall
