Refineries

THE ability of the Nalco System to provide continuously successful industrial water treatment under changing conditions, and in the widest imaginable variety of applications, is best proved by plants that use Nalco Service and Nalco chemicals year after year.

72.4% of all Nalco users have employed the Nalco System for over 3 years;
42% have been Nalco users over 10 years, and
25.3% of the over-10-year group have continued to get Nalco savings for more than 15 years.

Most of these plants had tried some other way to meet their water treatment problems before they discovered Nalco—the permanent answer. They are now getting the benefit of the world's finest water treatment laboratories, trained field engineers, continuous check-ups on their water conditions, scientifically prepared chemicals and specially developed chemical feeding and test equipment.

You can be sure of similar benefits if you call on Nalco. Write for details today.

Directory of Manufacturers

A BUYERS' GUIDE OF OVER 700 POWER

PRODUCTS AND WHO MAKES EACH

How to use this directory — Look for the noun in the product name, for example: "Strainers, oil," not "Oil strainers;" "Accumulators, steam," not "Steam accumulators." Cross-indices help to locate items.

Company names — Listed alphabetically under the product headings; advertisers in this issue appear in **bold-face type**.
