Re: Bulk samples from Marvin Rahn.

Dear Bill:

The bulk samples received April 13, 1987, have been analyzed for asbestos content by Polarized Light Microscope (PLM) and Dispersion Staining (DS). The results of our analysis are contained below:

LABORATORY NUMBER	SAMPLE I.D./ LOCATION	RESULTS	PERCENT ASBESTOS
B-872422	West center post Pondorosa Bldg.	No asbestos detected	N.A.
B-872423	Center post Pondorosa Bldg.	No asbestos detected	N.A.
B-872424	16' from overhead door Pondorosa Bldg.	No asbestos detected	N.A.
