RE: REVISION TO FORM SF - 4744 - "INSTRUCTIONS TO OPERATORS -- PRECAUTIONS AGAINST FIRE"

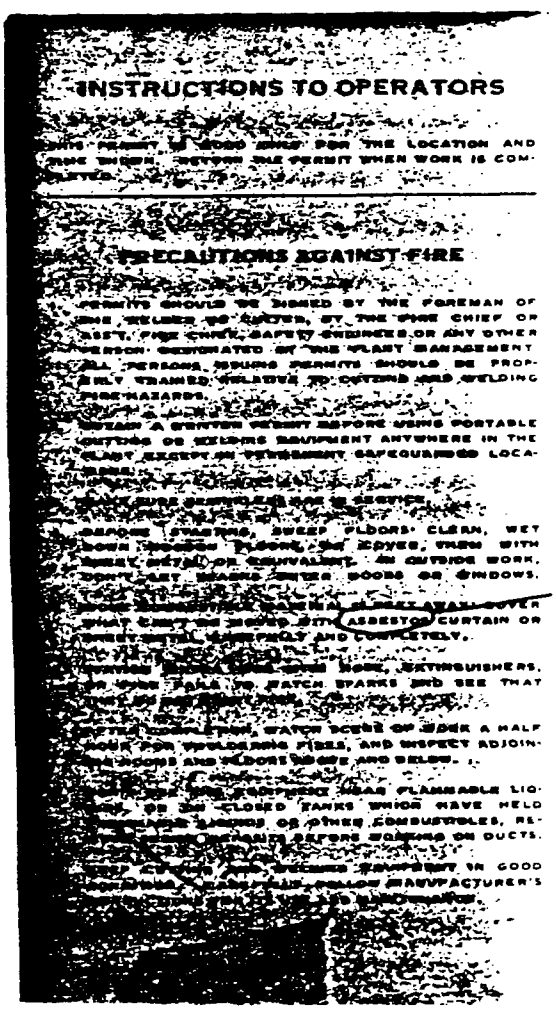

Confirming our telephone discussion yesterday regarding the captioned, please delete the word "asbestos" from Section 5, Line 2, and insert "nonasbestos fireproof" in its place. The sentence then should correctly read:

> "Cover what can't be moved with nonasbestos fireproof curtain or sheet metal, carefully and completely."

This change will put the form in line with Alcoa's policy of asbestos replacement.
