Mr. Philip Lawrence
B. F. Goodrich
P.O. Box 954
Louisville, Kentucky 40201

Dear Mr. Lawrence,

As you may already be aware we are in the process of developing a Cancer Center here at the University of Louisville. The Center will be one of the components of the national network of such centers that will serve as a framework for carrying out the National Cancer Program Plan.

We have been following with considerable interest the polyvinyl chloride/ angiosarcoma episode at B.F. Goodrich. I talked with Dr. Bradford Block last week expressing to him our interest in being of help in the continuing study of this problem. Dr. Block indicated that he would like to involve the University and is going to arrange a meeting with some of us here in the near future.

The purpose of this letter is to let you know that we are interested and willing to lend any help we can.

Sincerely,

Charles E. Kupchella, Ph.D.
Administrative and Scientific Coordinator
