

1 cleaned using an industrial-type vacuum cleaner with a
2 filtering system efficient to a three micron particle
3 size.

4 I read the next sentence that is
5 highlighted.

6 Disposal of asbestos laden dust from one
7 vacuum shall be done by wet methods of dust
8 suppression or the employee performing the operation
9 shall use a respirator specified by the U.S. Bureau of
10 Mines for pneumoconiosis-producing dust under
11 Approvals 21-C and Schedule 21.

12 Approval 21-C specifies single use
13 respirators approved for pneumoconiosis-producing
14 dusts.

15 Disposal of asbestos laden waste from the
16 vacuum cleaner shall be sealed -- shall be in sealed
17 containers labeled per Subparagraph G and H, Federal
18 Register, Section 1910, 93(A), pages 22143 and pages
19 2214 -- I can't read it.

20 MR. WILLIAMS: 4.

21 MR. SMITH: 4, OSHA.
