

The Bastian-Blessing Co.

240 E. Ontario Street, Chicago, Ill.

Welding and Cutting Equipment

Welding is the modern way of making pipe joints, and this process is rapidly gaining the support of engineers and architects who recognize its superior qualities. With properly welded joints where threads are usually used the following results may be expected:

1. Increased efficiency in flow.
2. Increased tightness and leak-proofness of joint.
3. Rapid erection and easy alteration.
4. Less dead weight.
5. Decrease in first cost and in cost of upkeep.

The most modern skyscrapers have welded piping throughout. A fund of information is available for the asking. Write and state your problems.

Welding School

Cutting New Opening

Complete units for both welding and cutting of pipes may be had for as low a price as \$75.00. Our complete catalog will be sent on request.
