

UNIVERSITY OF CINCINNATI
COLLEGE OF MEDICINE
DEPARTMENT OF ENVIRONMENTAL HEALTH

KETTERING LABORATORY
EDEN AND BETHESDA AVENUES
CINCINNATI, OHIO 45219

April 10, 1969

Mr. Ralph C. Bursick
Executive Vice President and
Vice President for Business Affairs
University of Cincinnati
Cincinnati, Ohio 45221

Dear Mr. Bursick:

I enclose herewith copies of letters which when acted upon by the appropriate authorities of the University will serve to renew the agreement between the International Lead Zinc Research Organization, Inc. and the University. This is not the usual form of such agreements entered into by the University, chiefly because it is addressed to me, as it has been for a number of years. (The International Lead Zinc Research Organization, Inc. represents Lead Industries Association, Ethyl Corporation, E.I. duPont de Nemours, and Associated Octel Company, Ltd. (London) for the purposes of this agreement, these industrial organizations having agreed to pool their funds for their mutual convenience.) The renewal of the agreement has been initiated tardily by the Research Organization because of some abrupt changes in its personnel in New York, but the support for the project has not been interrupted.

For the better information of all concerned, and considering my somewhat unusual relationship with this Department of Environmental Health, I have brought this entire matter (previous policies, etc.) to the attention of Dr. Foulkes, who has signified his approval of my action and relationship by countersigning this letter.

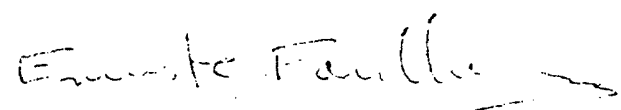

If you will retain your copy of this, after such action as the Board of Directors choose to take, and return the other copies to me, I shall comply with the request of the donor for their copies, and will also prepare for Dr. Foulkes' files copies of this and previous related agreements, as well as a copy of the attached proposal and those of previous years. I shall also follow my prior practice of providing copies for the office of the Dean of the Medical College. I have short-circuited the latter, for the moment, as a matter of dispatch.

Sincerely yours,

Robert A. Kehoe, M.D.
Professor Emeritus of
Occupational Medicine
