And that, if I saw nothing else -- you see, I can tell you without knowing Mr. Wood's history at all, I can tell you from looking at the slides that he has had very extensive exposure, and I can also identify the fact that he has mesothelioma.

Q These pleural plaques that you have seen under the microscope are described in the Marcus article as being pleural plaques that were seen by looking at X-rays?

A That is correct.

Q Again --

A As a matter of fact, if I may say so, the pathologist does a better job, but it is harder on the patient.

Q All right. Can you see any individual cells?

A Not at this part.

Q So we have to blow it up and make it larger to see individual cells?

A Absolutely.

Q All right.
