TO : Albert Solis

Albert, please accept my sincere thanks for the contribution that you made to the Hourly Safety Committee during the past year. You and the other members of the committee played an important role in helping to define many of our safety concerns and even more importantly, making suggestions and recommendations for solving many of the concerns. I appreciate the very positive attitude and sincerity you displayed in representing your group.

Because of your knowledge and experience, you are a very valuable resource to our plant safety program. You can use this experience and knowledge to help us seek out safety problems and correct them before someone is injured or equipment damaged. The plant will be most grateful for your continued support.

Sincerely,

Harry
