Upon returning from a visit to all the New England capacitor manufacturers, there was one general comment which I felt should be passed on to you and others concerned with the delivering of high quality Aroclor. All customers commented that they had noticed improved quality Aroclor delivered to their plants by Monsanto. With the objective to deliver improved quality, I think all concerned can take particular pride in a job well done. We look forward to continued improvement as the plant installations are completed. We know our plant people are well aware of the tremendous quality improvements but felt it worthwhile to pass on the customer reaction.

Regards.

J. G. Bryant
