MARCH 5, 1970

WASTE EFFLUENT RECOVERY
METAL WORKING INDUSTRY

YOUR MEMO 3/2/70

D. R. POGUE

P. G. BENIGNUS
J. R. FALLON
N. T. JOHNSON
D. A. OLSON

In your memo and the table attached, you talked about the reclamation potentials for the metal working industry.

In your study, we must think of reclamation not only of industrial fluids, but also of dielectrics and heat transfer fluids in the scope of the total project.

Therefore, would you please include this in your thinking. The numbers on potential should be available from Jack Fallon and Paul Benignus.
