Dr. Robert A. Kehoe
Kettering Laboratory of Applied Physiology
University of Cincinnati
Cincinnati, Ohio

Dear Sir:

We are interested in a case of lead poisoning. A claim has been filed against our client, The Timken Roller Bearing Company, asserting that a former employe contracted lead poisoning while working in the Company's metallurgical laboratory. The case is coming up for hearing before the Industrial Commission within the next two or three weeks.

Dr. Shaweker, the pathologist at Mercy Hospital in this city, gave me a copy of the January, 1935, issue of the "American Journal of Clinical Pathology," in which appears an article written by you on this subject. If it is possible we should like to go over this case with you with a view of retaining you as an expert witness to testify on behalf of the Company.

Will you please let me hear from you at your earliest convenience as to whether you would be interested in going over this matter. If so, I think I can arrange to come to Cincinnati, if necessary.

Very truly yours,

John G. Ketterer
