How to produce an "Award of Honor Day"

RC 321

Producing a Safety Award of Honor Day is a pushover — if you know how to do it. Chrysler's Nine Mile Plant in Detroit did it right. It racked up 4,003,191 manhours without a disabling injury.

To commemorate the occasion and to honor their workers, Chrysler played host to over 6,000 employees and their families at a plant open house.

RC 321

NOM received a miniature kit in a plastic case imprinted with "Nine Mile Plant Safety Award of Honor" as he arrived at Chrysler's open house.

RC 321

DAD had a chance to test his depth perception at the divorce/judgment booth. A brake reaction check was another feature of the Highway safety display.

RC 321

RID's love candy — and there was plenty of it for them in bags imprinted with "Nine Mile Plant Safety Award of Honor Day" and bearing the Green Cross for Safety.

RC 321

The tour included thirteen displays of safety equipment utilized in the plant. Management and union officials served as guides for the 4,500-foot tour.

RC 321

A display of fire protection equipment was among the patch of interest on the tour which included a glimpse of plant expansion plans and Chrysler components.
