FROM: D. A. Daly

AT: Middletown

COPIES TO: L. H. Oppenheim
J. E. Hughes
W. F. Bort
F. X. Kast

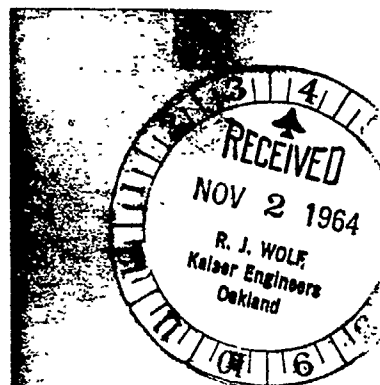

JOB NO.: 7100

SUBJECT: Armco Project "600" - Middletown Works Expansion Program

DAILY PROGRESS REPORT NO. 163

Assigned Program Personnel, October 29, 1964:

Technical	51
Construction	11
Administrative	9
Clerical	24
Subcontract	4
Personnel On Loan	3
Total	102

Progress:

1. Slag Processing Facility: Results of leasing arrangements with the Armel Construction Co. requires Armco to change the location of the access tracks for the Slag Processing Facility. This will result in a change for the Dicks Creek crossing. Revisions required to make this change are presently being investigated.
2. Hot Strip Mill Specifications: The memorandum specifications for the slab tongs and coil handling equipment have been submitted to Armco for approval.
3. Armco Standardization Specifications: Standard specifications were started in Chicago this week.
4. Building Architectural Treatment: Various architectural studies of the exterior walls were presented to Armco. One scheme was generally approved and requested to be developed further. The scheme concept is to provide a recessed base course approximately 14 feet high at all exterior walls. This base would encompass all truck, personnel, and ventilation doors. An additional detail is being pursued which will show a heavy eave line.
