James E. McKee - A3NB

November 11, 1977

Mr. R. C. Isham B1ND
Dr. L. A. Miller B3SA
Ms. Anna Navarro
Mr. J. T. Nolan

Mr. Pierre R. Wilkins 1650

Please see copy of the attached memorandum to Lee Miller from Jack Fitzgerald. This is somewhat in line with your earlier study. Please see if you, and possibly Anna, can be of some assistance to Lee Miller.

About a month ago I had correspondence from Bob Isham regarding a Japanese bacteria that apparently has been somewhat successful in breaking down the PCB molecular structure. I still wonder if this matter shouldn't be pursued further. Bob Isham's memo on the subject is attached.

James E. McKee
