DOCUMENT DESCRIPTION: Memo

CEMENT ASBESTOS PRODUCTS COMPANY

Birmingham, Alabama

January 25, 1971

FROM: S. D. Weaver

TO: W. R. Bond

Our policy on xraying the lungs of employees at Ragland has been to xray each individual prior to employment, then in 1969 we xrayed all employees with negative results.

We plan to xray again during 1971 in cooperation with National Cement. If this again proves negative, we plan in another two years to xray again.

We are installing improved dust collection equipment for the finishing lines at Ragland. We have not at present taken dust counts. This was discussed with Stan Mooney after a visual inspection tour and decided to withhold until some future date.
