White at the start... and it stays white!

HOW DU PONT HOUSE PAINT CLEANS ITSELF

1. All paint collects dust and dirt during the first few months, as shown by this magnified cross-section.

2. With Du Pont House Paint, a microscopically fine white powder forms after a few months on surfaces exposed to sun and weather.

and with it, much of the accumulated dirt and grime.

4. Self-cleaning leaves surface clean and white . . . keeps it sparkling white for years. This cleaning process is gradual and does not adversely affect the long life of the paint.

Keeps your home dazzling white for years! The original brilliant whiteness of your home will last for years and years—when you use Du Pont House Paint. A unique combination of top-quality pigments and oils, Du Pont House Paint actually *cleans itself* . . . keeps its bright, "freshly painted" look long after ordinary paints have become dull and dirty.

Sheds dirt, stays bright . . . through "self-cleaning"—With every heavy rain, Du Pont House Paint renews its original brilliant whiteness through a scientifically controlled "self-cleaning" process. Normally, this process begins within a few months. On surfaces sheltered by projecting eaves or heavy shade from normal exposure to sun and weather, in areas where the atmosphere is smoky, or on surfaces stained by copper or bronze, this "self-cleaning" action may be delayed or even prevented from taking place.

Goes on fast and easy . . . gives complete protection—Special oils have been added to Du Pont House Paint to make it brush on faster and easier than ever before. Remember, the paint itself is the smallest part of the cost of painting your house. Make sure you get the paint that keeps your home looking its best . . . that protects it against rust, rot and decay for years. Get Du Pont House Paint—in white or popular "self-cleaning" colors. It's today's best value! (And *for real* two-coat economy, start with Du Pont House Paint Primer if the surface is new wood or badly weathered old-paint film.)
