AND INDUSTRIAL RELATIONS

February 22, 1974

Mr. George M. Parker
International President
American Flint Glass Workers'
Union of North America
1440 South Byrne Road
Toledo, Ohio 43614

Dear Mr. Parker:

In order to keep your office aware of our progress in examining Port Allegany employees exposed to our former Unibestos operations, the following information is presented:

As of this date, the bulk of our active employees have completed the full physical examination including X-rays, as outlined in my previous letter.

Included in this group were other employees who, although not assigned to the Unibestos operation, had periodic exposure relating to their job (maintenance, general servicemen, etc.). We have begun testing of retired employees and hope to complete this group in the near future.

A few inquiries have been received from former employees. They have been told that upon receipt of a statement by their personal physician that, in his opinion, a current illness or condition is related to his former employment with Pittsburgh Corning, they will be scheduled for a complete examination with our local physician and appropriate X-rays at our expense.

Physical examination results which, in the opinion of our local physician, need further evaluation will be forwarded to our Corporate Medical Consultant, and, if necessary, appropriate medical specialists.

We will keep your office informed as to our progress. Your comments and suggestions are appreciated.

NOTE: THIS DOCUMENT DID
NOT COME FROM PPG FILES

Sincerely,

R. C. McPherson
