December 16, 1964

TO: J. A. KELLEY

RE: Libby
Dust Problem - All Locations

Joe:

Please refer to the correspondence I called to your attention when you were at Cambridge on December 11, i.e. letter from L. E. Park of Maryland Casualty to Zonolite dated November 5, 1964 referring to Wilder.

Also refer to the attached letter December 11, 1964 from Frank Rupp acknowledging Dr. Woodrow Nelson's letter of November 20, 1964, which I have no indication you have seen.

We cannot solely rely on Maryland Casualty Company's doctor to be "interested in this problem". Zonolite, and you particularly, must direct the effort to minimize Grace's exposure.

Was there some particular incident which brought Dr. Nelson into the act?

Please draw up a program and report to me before January 8 who is going to do what, when, and the extent of any additional information in the possession of Zonolite with respect to this potential problem.

By copy of this memorandum, I am also asking Paul Cahalane and Charlie Krauter to coordinate effort with you as indicated.
