DOW CHEMICAL COMPANY
Department of Epidemiology
1803 Building
USA- MIDLAND MI 48674

Brussels, 19th May 1993

Dear Dr. Ramlow,

As referred to my previous letter, of which I enclose a copy, I would be grateful if you could send me the information I was asking for.

As far as I know there was no reported Angiosarcoma of the Liver (ASL) case in the various plants owned by Dow. I enclose herewith a blank data sheet in case you should need it.

The Vinyl Industry, through APME, has asked me to up-date the ASL Register in order to prepare its new edition which is planned in a near future. This report will help the industry to assess the effect of the drastic diminution of workers exposure to VCM, which could be obtained in the mid-seventies, thanks to a change of technology, on the occurrence of the ASL.

I thank you very much for the help you may give me.

Yours sincerely.

Françoise Drion M.D.
