R.L. DANIEL

Dear Dr. Mac Mahon,

I was pleased to learn from Dr. William Gaffey of the Monsanto Company that you are willing to peer review the CMA benzene epidemiology study. Environmental Health Associates is under contract to CMA to conduct the study; Dr. Otto Wong is the project director. The project is presently in the analytical stage and a draft report is expected in March.

For your information, I enclose a copy of the study protocol and a guideline for peer review. After looking over these materials, I would appreciate an estimate of the time you would require for review and your consultant fee.

I look forward to your involvement in this study and hope to hear from you soon.

Sincerely,

Carol R. Stack  
Administrator  
Benzene Program
