

RE 0000462

Great Falls, Va

Mr. Robert H. Keller

Hyland Farm Apt

Convent, Ohio 4502

Dear Mr. Keller:

I received your letter of Oct. 16 the day after I sent you my last letter. Your letter came as a surprising surprise. You seemed upset by some thing yet you did not offer any explanations about your concerns.

Regarding your data: I do not have any of the clinical data on the subjects. You have all of the original data except for a couple of lab. tests containing a small amount of chromium data. I'll return these to you as soon as all questions of ~~generality~~

data accuracy have been cleared.

Dr. Keller, we have had many years of friendship,

openness and mutual trust. Thus, I am particularly

grieved about your allusion to my speaking for you. The fact is I have never represented you without your prior approval. Also,

I can not speak as eloquently and insightfully about your work as you can, nor do I intend to try to speak for you. I

discuss

hope you will follow through with your own ~~concerns~~ of my analysis after long, because now I have cleared all

Memorandum
P.S. I would like to add a page of tribute to the
final paper in which I reflect on the importance
of your work and ~~the~~^{your} dedication in completing
your experiments.
