ARO's Fleet Has it All

SCF-EC-1240

Run cooler,

with the extended life tandem. EATON® single speed.

For sustained highway operation, nothing logs the miles like EATONEX® on-center gearing. Precision engineered for high horsepower. With extended gear tooth contact area.

The Eaton 2-shaft power divider is a big life factor. Fewer moving parts. Greater stamina. A Forced Flow system circulates lube everywhere. Gears run cooler.

Conical carrier design strength permits bigger payloads — for life.

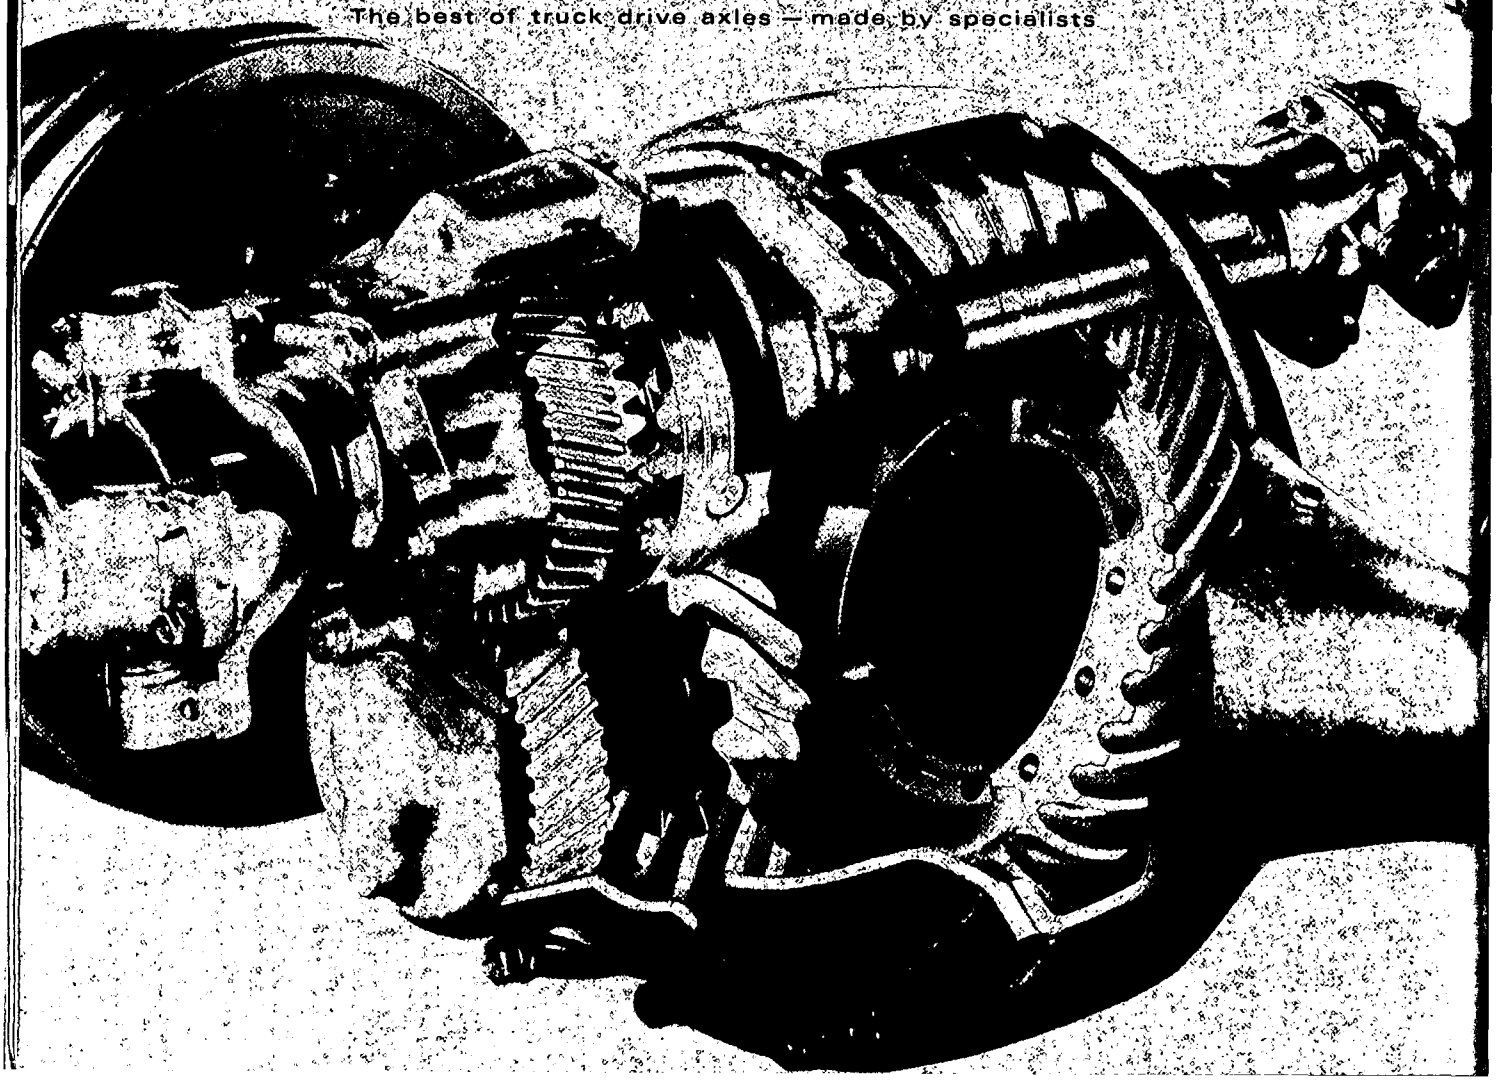

Specify Extended Life Eaton DS tandems in capacities to 44,000 lbs to fit your job.
