sawed around him and creating dust which he inhaled.

Assume, again, that the product contained the same amount of asbestos. Assuming those facts to be true, do you have an opinion as to which, if any, exposures to the Kaylo pipecovering and block would have been substantial contributing factors to the development of his disease?

MS. TOSTANOSKI: Objection.

THE COURT: Overruled.

A Yes.

Q And what would be your opinion, Dr. Rubin?

A Again, any and all of those exposures would be contributing factors to his development of mesothelioma.

Q Is mesothelioma a cumulative dust -- cumulative exposure disease?

A Yes.

Q Would all of the exposures he had on his job contribute as well?

A I believe so.

Q Asbestos exposure?
