EDITORIAL ACKNOWLEDGMENT

THE Technical Data Section of THE GUIDE 1930 is indicative of the most modern engineering practice and it comprehensively covers the current knowledge on heating and ventilation compiled, condensed and revised from all available sources.

These data have been contributed freely by the foremost engineers of the United States. In no other way, save through the medium of this Society,—unfettered by commercialism or self-interest,—could the liberal cooperation of these men have been obtained. THE GUIDE acknowledges the loyalty and cooperation of the men who have labored so generously to the end that its text pages shall serve usefully to advance the interests of the profession.

The following members of the Society and their friends have contributed to THE GUIDE 1930 without compensation, except that which comes from generous public service:

R. L. BEERS	F. C. HOUGHTEN
R. G. BIRKHOLZ	A. M. HOUSER
D. R. BREWSTER	J. H. KITCHEN
R. M. CONNOR	W. K. LEWIS
A. A. CRIQUI	E. C. LLOYD
C. H. FLINK	G. W. MARTIN
DONALD FRENCH	J. H. McILVAINE
W. GARDNER, JR.	H. C. MURPHY
F. E. GIESECKE	A. J. NESBITT
F. E. HARTMAN	H. M. NICHOLS
J. M. HARTMAN	S. I. ROTTMAYER
J. J. HAYES	T. K. SHERWOOD
R. H. HEILMAN	H. F. TAPP
J. D. HOFFMAN	M. C. W. TOMLINSON
J. C. HORNUNG	F. W. WANDLESS
	PERRY WEST

The debt of the profession, its allied industries and the public at large who will receive the benefits resulting from the untiring work of these contributors, is hereby acknowledged.

GUIDE PUBLICATION COMMITTEE

S. R. LEWIS, *Chairman*,

C. V. HAYNES W. H. CARRIER

J. F. McINTIRE
Vice-Chairmen

P. D. CLOSE, *Technical Secretary*
