RE: Request for Specifications Manual

Gentlemen:

I am a member of the Safety Engineering Department of Hartford Insurance Group and often do field surveys for general contractors utilizing your products and materials. In order to familiarize myself with all types of materials being utilized in the field, especially with regards to product liability implications, I would appreciate a copy of your specification manual for built up roofing systems.

The manual would also contain chapters on roof insulation and drainage systems, an estimator's guidebook, and a fire classification and resistance directory section.

I thank you very much for your time and consideration and look forward to hearing from you.

Very truly yours,

Robert D. Savo
Hartford Insurance Group
