October 19, 1942

Dr. Sydney D. Weston
872 Prospect Pl.
Brooklyn, New York

Dear Doctor Weston:

In reply to your query in the case of

[REDACTED] who was under our mutual care at the
Beth Moses Hospital, in respect to his blood dyscrasia,
may I state that it is known from my own clinical studies
and the experiments of others that benzol poisoning may
cause a blood picture analogous to the type in his case.
Since Mr. [REDACTED] has been exposed to Gasoline fumes
for many years, the possibility that this may be a factor
in his case can be entertained.

With best wishes, I am

Cordially yours,

Signed - Bernard Sternberg, M.D.
