

ETHYL CORPORATION OF CANADA LIMITED

Memorandum of
Meeting with Division of Industrial Hygiene
Quebec Department of Health
Montreal, Quebec

Subject: HIGHER TETRAETHYL LEAD CONTENT IN MOTOR FUEL

The meeting was held on Friday, December 18, 1959, at 10:00 A.M. at the Division of Industrial Hygiene, 1570 St. Hubert Street, Montreal, P.Q. Present were Dr. F.J. Tourangeau, Director of the Division, Mr. A.C. Tully and Dr. D.R. Warren. Dr. Tourangeau did not ask any other members of his department to attend the meeting.

It was obvious that a good deal of Dr. Tourangeau's time is currently being spent in coordinating air pollution prevention work through his department and the industries in the Montreal area. It seemed that he had much more to do than his staff could accomplish, but a reasonable approach to industrial hygiene of air pollution in its widest sense would seem to be the theme in Quebec.

The location of Dr. Tourangeau's office, the organic layout of his division, plus the fact that construction was in progress in the corridors combined to create a rather unfavourable impression. However, we were received cordially and our presentation was well received. I believe Dr. Tourangeau appreciated

Meeting - December 18, 1959

the company gesture of keeping them in the picture of any future plans of customers adding larger amounts of tetraethyl lead to motor fuel. He did not appear in any way concerned.

The discussion lasted approximately one hour.
