Analysis of Personal Monitor Samples for Acetonitrile

The carbon tube personal monitor samples which arrived on 11-11-75 have been analyzed. Corporate Environmental Services Lab has measured each amount of adsorbed acetonitrile. These samples have been given the following log number: 227.

Sample #	MG Front Section	MG Back Section	Total MG	Air Volume Liters	PPM in Air
1	.1470	.8095	.956	8.081	70.5
2	.2872	.1473	.434	6.870	32.0
3	.0208	.0117	.032	5.887	3.3
4	1.1834	.6789	1.862	7.660	144.8
5	.0319	.0129	.045	5.377	5.0
6	.1413	.0831	.224	5.647	23.7
7	.3137	.2141	.528	6.679	47.1
8	.9735	.0432	1.017	8.602	70.4
9	Broken in transit
