Dear Dr. Kehoe:

In Re: DIXON vs ROSICHAN, et al

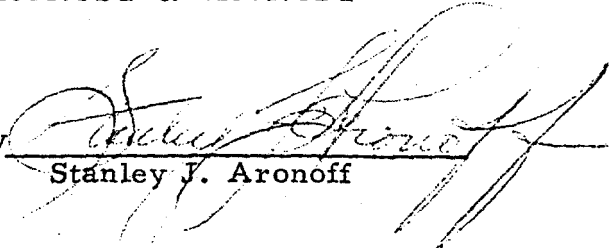

It has been quite some time since we discussed this case and the results of the studies being conducted by the doctors. I think that this is a very favorable atmosphere to achieve some form of legislation via ordinance. Would you be good enough to inform me of the results of the findings of the doctors. Do you think that it is advisable for the doctors to recommend specific legislation to City Council?

Assuming that there will be another influx of lead poisoning cases beginning in the spring, this is probably the time to begin educating the public as well as attempting to get concrete results.

I shall be guided by your opinion.

Very sincerely,

ARONOFF & ARONOFF
