Mr. M. R. Schwab
Jersey Nuclear Company
P. O. Box 130
Richland, Washington 99352

Dear Mr. Schwab:

Thank you for your inquiry on converting your Therminol FR heat transfer system. Literature on two possible replacement fluids, Therminol 55 and Therminol 66, is enclosed. We will also send you a copy of our conversion bulletin as soon as it becomes available.

We would like to remind you that Therminol 55 and 66 are not classified as fire resistant heat transfer fluids. Consequently, you may wish to consider the use of protective devices to minimize any added fire risks. We suggest that you consult with the insurer of your property relative to this matter.

We will pay freight costs incurred in returning the Therminol FR to us and will properly dispose of the material by high temperature incineration. We will also accept return of any unopened drums of Therminol FR series products which may be in your possession and credit you for this material at full purchase price if returned prior to March 1, 1972.

I will be happy to answer any additional questions you may have on the conversion. Your cooperation is appreciated.

Sincerely,

Frank M. Calkins
Heat Transfer Specialist
