copy sent to Dr. Irby

March 26, 1979 "Caution: ASBESTOS DUST..."

John Carson, at MRD, and George Martin, of Mill Products, have recommended that the attached booklet on asbestos be distributed to our employees as an educational pamphlet. As you know, asbestos has been of much concern to us, and I have tried to treat this issue in a very low key manner and have dealt with specific problems as they have arisen at individual plants. I do not feel that any real purpose would be served by dissemination of this pamphlet.

As you may be aware, we are working very actively at replacing asbestos-containing products throughout the entire company, and our present problems primarily deal with disposal and demolition of material already in place.

Since Messrs. Carson and Martin feel strongly about the pamphlet's usefulness, I thought you might be interested.

Homer M. Cole
